-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 04 August 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 139-159 is/are pending in the application.
- 4a) Of the above claim(s) 148-156 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 139-147 and 157-159 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

DETAILED ACTION

Applicants' amendment and request for reconsideration in the communication filed on 8/4/03 is acknowledged and the amendments entered.

Claim Rejections-35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 139-147, and newly added claims 157-159 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dahiyat et al. (IDS document: US Patent No. 6,403,312) in view of Venkatasubramanian et al. (IDS document: J. Chem. Inf. Comput. Sci. Vol. 35, pages 188-195, 1995).

Claims 139-147, and newly added claims 157-159 are drawn to a computational method of identifying a set of oligonucleotides for use in an in vitro recombination procedure.

Dahiyat et al. disclose a method of protein design for protein libraries. As an example, Dahiyat et al. teach of a procedure for making and computationally screening an array of mutant polypeptides of β -lactamase TEM-1. See columns 30-34. The procedure comprises providing data for the sequence of TEM-1 and computationally identifying positions of the sequence that are to be allowed to change their identities (column 30). The procedure also comprises computationally prescreening on TEM-1 by using Dead End Elimination optimization method to find the lowest energy, ground state sequences (column 31). The multiple peptide sequences are generated by taking consideration of the stability of the conformation of the polypeptide and the stability of the conformation of the enzyme's active site. Also see column 7. To synthesize the recombinant peptide sequences, a set of overlapping oligonucleotides including all desired mutations are identified and synthesized to be used to generate a mutant sequence library. See column 32. The method also comprises additional genetic operations such as PCR multiplication using the identified oligonucleotides, which would introduce mutations at the various positions selected.

Dahiyat et al. do not explicitly recite the term "crossover" as required in the instant claims.

Venkatasubramanian et al. discloses a computational method of designing new chemical polymers using genetic algorithm. The method comprises providing two mating parents of chemical polymer and manipulating the mating parents using such genetic operators as crossover and mutation to produce derivative chemical polymers with desired properties. See page 188, right column, bottom paragraph and page 189, left column. Venkatasubramanian et al. also discuss recombination of nucleic acids (see page 189, left column).

A person of ordinary skill in the art would have been motivated by Venkatasubramanian et al. to apply crossover as a genetic operator in the process of artificial recombination of nucleic

Art Unit: 1631

acids, and in the process of Dahiyat et al. to computationally identify oligonucleotides for recombination.

Conclusion

No claim is allowed.

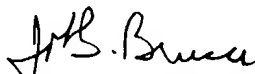

Papers related to this application may be submitted to Technical Center 1600 by facsimile transmission. Papers should be faxed to Technical Center 1600 via the PTO Fax Center located in Crystal Mall 1. The faxing of such papers must conform with the notices published in the Official Gazette, 1096 OG 30 (November 15, 1988), 1156 OG 61 (November 16, 1993), and 1157 OG 94 (December 28, 1993)(See 37 CFR § 1.6(d)). The CM1 Fax Center number is either (703) 308-4242 or (703)305-3014.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to:
Shubo "Joe" Zhou, Ph.D., whose telephone number is (703) 605-1158. The examiner can normally be reached on Monday-Friday from 8 A.M. to 4 P.M. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Woodward, Ph.D., can be reached on (703) 308-4028.

Any inquiry of a general nature or relating to the status of this application should be directed to Patent Analyst Tina Plunkett whose telephone number is (703)-305-3524, or to the Technical Center receptionist whose telephone number is (703) 308-0196.
